BACKUP....

The basic idea behind BACKUP is 3 fold..(i)To provide cheap high quality gear nationally...(ii)To inject an O.D. sized dose of realism into the punk scene at a time when it is in grave danger of becoming another dumb conveinience and commodity-even if this injection of realism simply takes the form of providing cheap high quality gear & helping out those who need it with the proceeds then its at least sidestepping the middlemen leeches who live parasitically off anti-establish-ment movements as an alternative career,and(iii)To raise money to help out people in financial difficulties such as having your water,gas or electricity cut off.And those living on societies dividing lines-pensioners,homeless youth,single parent families,prisoners-parolled and those still locked down,and people having trouble paying fines.Even if we can give a few dollars here and there to the people who need it -it's worth it in the broader scheme of things.

The time is right for the foundations to be layed for a genuine attempt at rebuilding the spirit of community within the ranks of the people discarded,exploited and oppressed by this out of control steam roller called'society'.We have so much in common with each other as societies fodder that what divides us is only the fear and alienation that the system instills in its inhabitants to keep them seperated and under control.

These foundations upon which the building blocks of real resistance will be built,begin with us looking out for each other.It's as simple as that-no complex theories -no in depth arguements...just basic common sense.

And the punk scene can contribute to this by example-by ending the back stabbing and looking out for each other all the time.

UNITED WE STAND ...
DIVIDED WE LIVE ON OUR KNEES....

Having said all this,BACKUP isn't winging it as a new breed of 'hardcore' social workers or making a calculated career move at becoming the new Salvation army,but initiating a desperately needed move in the direction of reality for some of the ideas that punk verbalizes....a nitro strike that will hopefully ignite similar-but different -attempts by other discontented groups to help each other out autonomously. We'd like people to get involved-benefit gigs and donations are what's needed.

Absolutely NO money is taken out for wages...all the money goes where it is intended-no shuffling a few notes into a Swiss bank account or tax exiling it to Spain in an Oxygen mask.It's all straight up,and every 6 months we'll publish exactly whats been achieved.This catalogue will be updated every 3 months,so if you want the latest then just send in an S.A.E.and we'll mail it to you pronto.

Shoot straight,

BACKUP.
